

PRESS RELEASE 08/2017

**Print'nGo ASLAN DFP 33 –
The new slip-resistant 2-in-1 solution for self-adhesive floor graphics**

ASLAN, the German manufacturer of self-adhesive films for special applications, is complementing its floor graphics range with an additional slip-resistant, directly printable film. Print'nGo ASLAN DFP 33 does not require any additional protective laminate after printing, whilst providing the rough surface characteristics needed for non-slip category R9 classification.

The 125 µm thick matt white film provides a safe floor graphics solution for short-term interior designs on smooth floors, saving time as well as material. Within six months, this self-adhesive film can be removed in one piece from all smooth surfaces without leaving residues.

With its R9 classification, the floor graphics film meets the requirements for interior floor coverings in public spaces, making it safe to use for short-term applications at the PoS, at airports, train stations, shopping centres and trade fairs.

The film generates excellent scratch-resistant images from solvent, latex and UV printing methods and is ideally suited for print & cut applications. Print'nGo ASLAN DFP 33 is available in 25 m x 1.37 m.

For further information and samples, please contact ASLAN on +49 (0) 2204.708 80 or visit www.ASLAN-Schwarz.com.
