

PRESS RELEASE 06/2018

**ASLAN introduces a new laminating film, in matt and gloss, especially for the protection of UV-curable inks**

**Overath, June 2018** – ASLAN, the German manufacturer of self-adhesive quality films for special applications, has developed a new high-quality laminating film especially made for UV-curable inks.

The self-adhesive PVC-film is available in the dimension 1.35 m x 50.0 m.

**New protection film for prints with UV-curable inks**

ASLAN, the German manufacturer of self-adhesive special films, now offers a new laminating film for the protection of UV-curable prints. The self-adhesive film is available in matt and gloss and was especially developed for the protection of substrates printed with UV-curable inks.

This transparent laminating film protects the printed surface from UV rays, weathering and mechanical wear.

Compared to a conventional laminating film, the special adhesive of UV-PrintProtect ASLAN SL 27 and ASLAN SL 28, guarantees excellent adhesion on UV-curable printed media without any of the disturbing silvering effect.

This high class laminating film is the right choice for digital prints with a high color brilliance, is scratch resistant and ideally compatible with the ASLAN digital printing films.

For further information and samples, please call ASLAN on +49 2204.708 80 or visit [www.ASLAN-Schwarz.com](http://www.ASLAN-Schwarz.com).
